**This service is used to independently verify the output of a clinical linear accelerator. Patient TLDs are placed the patient at the site of interest under bolus to provide charged particle equilibrium. Dose-response TLDs are irradiated on phantom under the same build-up conditions as the patient TLDs. Each order is shipped via FedEx Priority to arrive by 10:30AM. ONLY shipping to your facility is included in the price. You are responsible for all return shipping costs.**

**\*\*I accept the Terms of Service as published on the UWMRRC website: <http://uwmrrc.wisc.edu/ToS> Required\*\***
